EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Janine D. Geraigery (Reg. No. 54,118) on about 3 November 2006.

2. The application has been amended as follows:
- a. In claim 5 line 1 after the words "golf club" the word -- grip -- has been added.
 - b. In claim 6 line 1 after the words "golf club" the word -- grip -- has been added.
 - c. In claim 6 line 3 after the words "golf club" the word -- grip -- has been added.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: None of the prior art discloses or renders as obvious a progressively and uniformly decreasing external diameter from a first diameter to a second diameter, a second diameter adjacent to a cap end, an integrally formed alignment means extending upwardly from an exterior surface of the body in alignment with the longitudinal axis of the shaft in addition to the other elements of structure claimed. The examiner has considered the

argument that this combination of claimed features was not obvious due to the commercial success of the grip after its introduction into the market and there is a nexus between the claimed invention and evidence of commercial success. After reviewing the total number of grips sold (372,768) from March 1, 2004 to March 31, 2006 and the amount of money used to market the grip the examiner as concluded that there is a nexus between the claimed invention and evidence of commercial success. It is believed that the increases sales were not the result of heavy promotion or advertising or a shift in advertising. Plus the sales of the grip continues to grow rapidly with very little money put towards marketing. The examiner can only conclude that it is this claimed combination of a reverse tapered grip with the alignment means extending upwardly and aligned with the longitudinal axis of the grip which is solving problems not previous solved for golfers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
